Subject:	Re: [android-team] Fwd: Java News from Sun.	

Fascinating... So that might work for us then.

On 11/12/06, Andy Rubin <arubin@google.com> wrote:

Apps have to link with the class libraries. GPL is viral through link, so that means that any app written on top would also be GPL.

Sun will offer a rider that says that linking with their libs will not trigger the viral nature of GPL.

That's what I was thinking... The license terms should be very interesting. What's a "link exception"?

On 11/12/06, Andy Rubin < arubin@google.com > wrote:

I called and left a message friday, no return. This should jolt her into reality.

Anything from Shari?

On 11/12/06, Andy Rubin <arubin@google.com> wrote:

They say they will be announcing a "link exception" as well. We'll
have to see exactly what it says, but in the best case it could mean
we can use their libs and even vm, if any of it is good.
